MEMORANDUM FOR: Deputy Director of Central Intelligence

THROUGH

: Executive Mrector -- Comptroller

SUBJECT

: Approval of Funds to Pursue Development of General Purpose ELINT Processor

- 1. This memorandum transmits a recommendation for approval. Such recommendation is contained in paragraph six.
- 2. The Office of ELINT has a requirement for a means of reducing analog ELINT data to digital form for computer processing in field environments. Its objectives are increased efficiency in analysi manpower, reduced analysis time to provide signal environment information to airborne operations, and a data format suitable for machine processing of statistical parameters of emitters and their locations.

a study of the problem, utilizing a general-purpose computer as a processor model. The computer, suitably programed, was found capable of reducing raw data to printed form with performance comparable to that of a human analyst in less time. Success in the study program resulted in solicitation of the present proposal, which represents a processor suitable for field use with characteristics similar to the previous one. The processor will convert analog FLINT tapes of up to eight kilocycles per second to a digital tape format, a printed emitter list and a visual display for smitter identification.

LABBE 1
Excluded from automatic dewngrating and declassification

FOLULIANI.
